Sastra-LWC

# PROBLEM STATEMENT

- To find the appropriate crop for the farmers in various locations in India
- Crops to be recommended by taking soil profile and weather conditions based on the geolocations

# MISSION

- Weather Forecasting
- Training a model using machine learning to recommend crops
- develop a web application for a seamless user experience

Sastra-LWC

# GOAL AND STRATEGY

- Weather Forecasting-used an open weather API
- Training model-Random Forest Classifier (Archived an accuracy over 99% )
- Web Application- used Django framework and deployed using AWS
